

Modifications required to fit RAC016 Dynalite in place of original Bosch Dynamo

Original upstand, part number 539.01.145

This is the standard bracket which can be machined out to take the new alternator by measuring up the centre line 142mm then machining a 100mm diameter.

Modified upstand

Alternatively we can supply a ready to fit bracket that we have already machined

If in doubt, please contact your Powerlite distributor or contact us directly – we'd be happy to help!
